

Asset Utilization Intelligence Solution

Solving your industrial asset management challenges, simply and affordably.

Rayven's ready-to-go, cloud-based Industrial Asset Utilization Intelligence solution is designed to address all your asset management, utilization and compliance needs, providing you with 24/7 transparency and predictability.

Empower your team with forecasting and predictions, actionable insights, real-time alerts and notifications, visualizations, and reporting - Rayven's Asset Utilization Intelligence solution has everything you and your team needs to always stay one step ahead.

Designed to be future-proof, Rayven's flexible platform allows you to bring data from any asset or source, including **heavy vehicles, pumps, motors, factory machinery, warehouse equipment** or any other equipment; into one place for monitoring, analysis and optimization.

Heavy Vehicles

Pumps

Motors

Factory Machinery

Warehouse Equipment

Real-Time Monitoring

Predict & Alert

Analyze & Report

Continuous Compliance

Predict industrial asset failures before they happen

Predictive Maintenance

Intelligent asset monitoring allows you to predict and prevent failures, improving safety and efficiency.

Pump Utilization

Get real-time insights into performance, ensure that they are being used efficiently and maximize lifetime and performance.

Machinery Monitoring

Operate efficiently and meet your production targets by ensuring that your machinery is utilized to the maximum and doesn't break down.

Motor Performance

Monitor your assets' motor's performance to identify maintenance needs, spot trends in asset classes and find efficiency savings.

Warehouse Equipment

Easily identify location, under or over utilization and the out-of-hours usage of your equipment across your fleet.

Heavy Vehicle Utilization

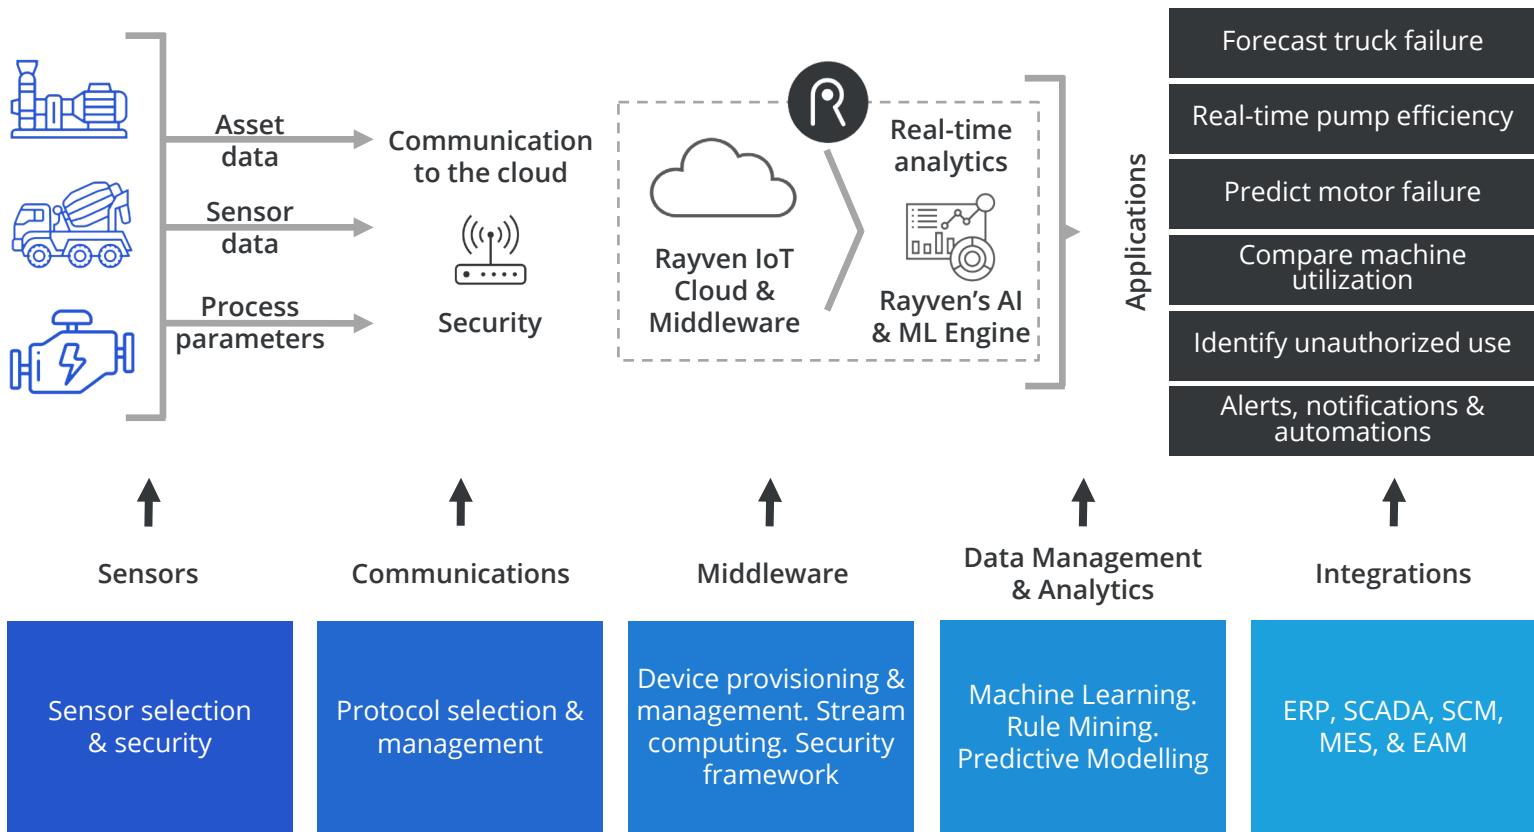

Continuous monitoring of your heavy vehicle fleets' utilization allows you to identify underperforming vehicles and optimize their performance.

Get started in weeks for a lot less than you might think

Rayven's ready-to-go, cloud-based Asset Utilization Intelligence solution will give you all the monitoring abilities you need, plus much more, in weeks with no hidden-costs.

Solution technology stack

Security.

Rayven's IoT platform has been built with security top-of-mind. With data encryption and other security techniques and technologies factored into all points of the IoT environment.

Connectivity.

Get the complete picture by using our extensive range of ready-to-go IoT connectors. You can funnel all your data into Rayven's IoT platform, giving you a true single source of truth to drive real business outcomes.

Data integrity.

You can't make a business decision without complete confidence that the data you are looking at is 100% complete and accurate. Rayven has developed proprietary processes that can ensure its integrity.

Data Science.

Rayven's industrial data science team lives and breathes data, uniquely understanding the value it can bring to your business. IoT is not about collecting *lots* of data, it's about collecting the *right* data and doing smart things with it. Our experts will guide you through this process, ensuring you get the most out of your solution.
