Continuous Compliance

# Real-time facility asset management & compliance intelligence

## Energy Efficiency

Continuous energy monitoring of your facility's assets enables you to optimize your energy use and minimize waste.

## Water & Pumps

Get real-time insights into the performance of your water pumps, flow, pressure, leaks and consumption of water.

## Environmental Compliance

Continuous environmental monitoring of your sites ensures you are always compliant and not liable for fines.

## Facility Asset Utilization

Operate efficiently and meet your targets by ensuring that your assets and machinery is utilized to the maximum.

## Asset & Equipment Monitoring

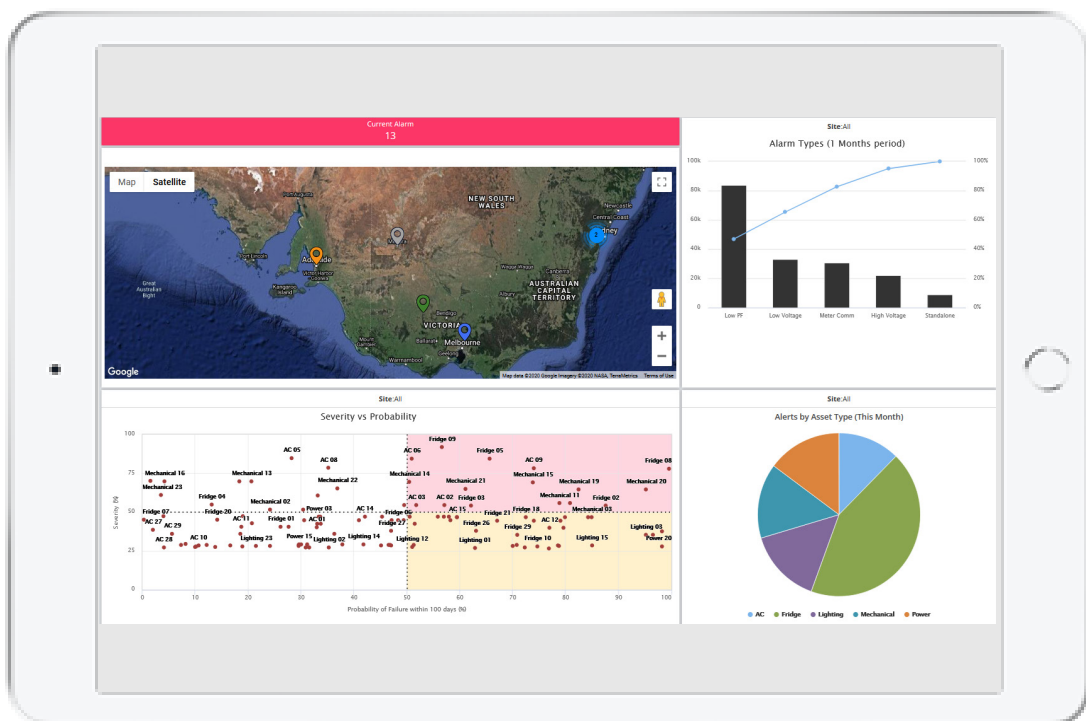

Easily identify location, under or over utilization, and the out-of-hours usage of your equipment across your facility.

## Predictive Maintenance

Intelligent asset monitoring allows you to predict and prevent failures, improving safety and efficiency.

Get started in weeks for a lot less than you might think

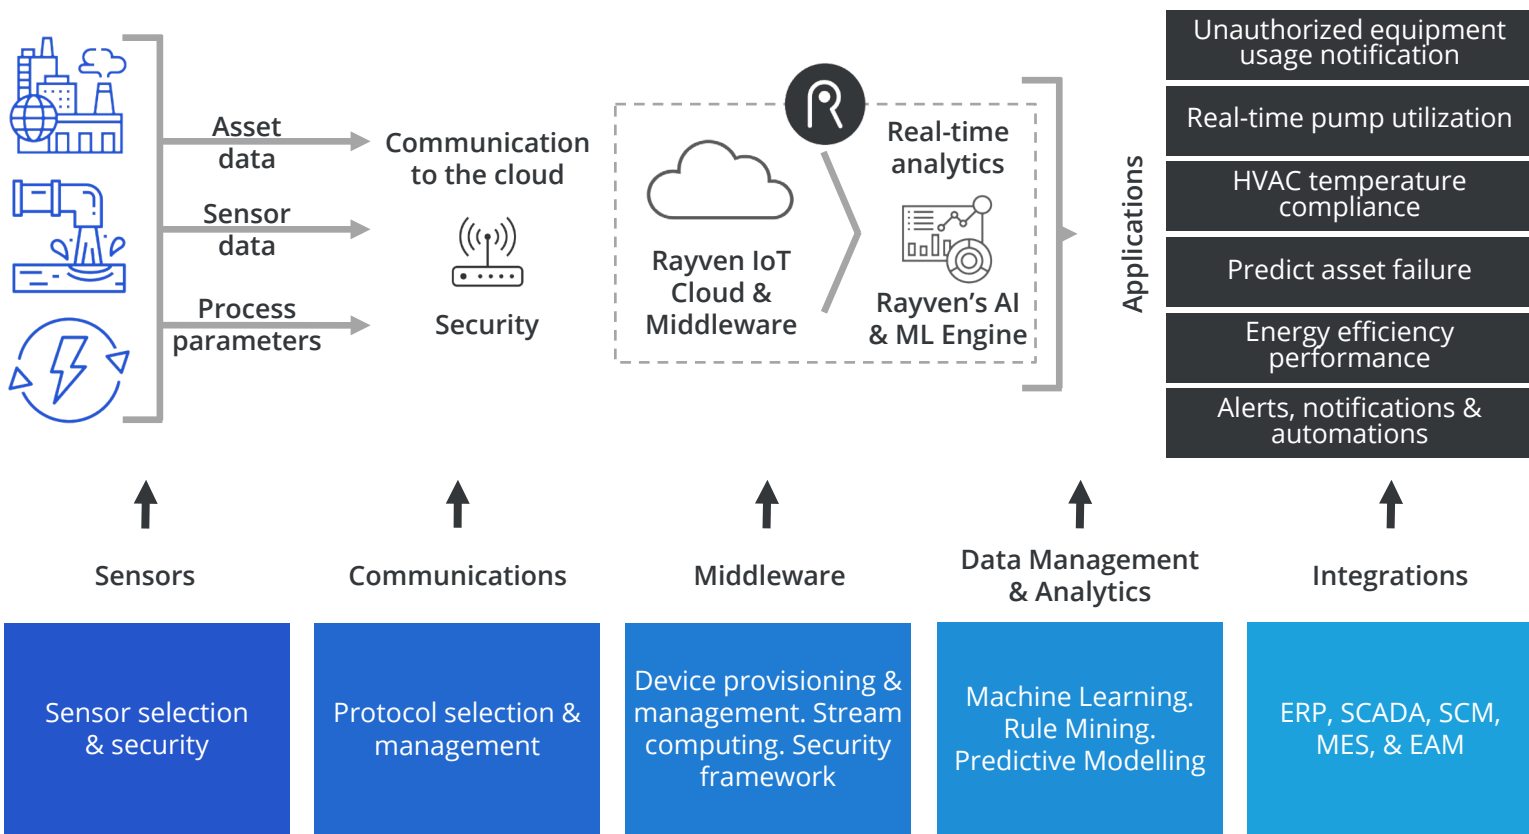

Rayven's ready-to-go, cloud-based Facility Asset Management Intelligence solution will give you all the monitoring abilities you need, plus much more, in weeks with no hidden-costs.

Rayven can solve your problems out-of-the-box. Speak to us today.

# Solution technology stack

## Security.

Rayven's IoT platform has been built with security top-of-mind. With data encryption and other security techniques and technologies factored into all points of the IoT environment.

## Connectivity.

Get the complete picture by using our extensive range of ready-to-go IoT connectors. You can funnel all your data into Rayven's IoT platform, giving you a true single source of truth to drive real business outcomes.

## Data integrity.

You can't make a business decision without complete confidence that the data you are looking at is 100% complete and accurate. Rayven has developed proprietary processes that can ensure its integrity.

## Data Science.

Rayven's industrial data science team lives and breathes data, uniquely understanding the value it can bring to your business. IoT is not about collecting *lots* of data, it's about collecting the *right* data and doing smart things with it. Our experts will guide you through this process, ensuring you get the most out of your solution.
